## 2025 Capital Improvements Element

Project  
**3-309**

### Project Name

Brooklyn Creek Interceptor  
Improvements Phase 2

### Project Category

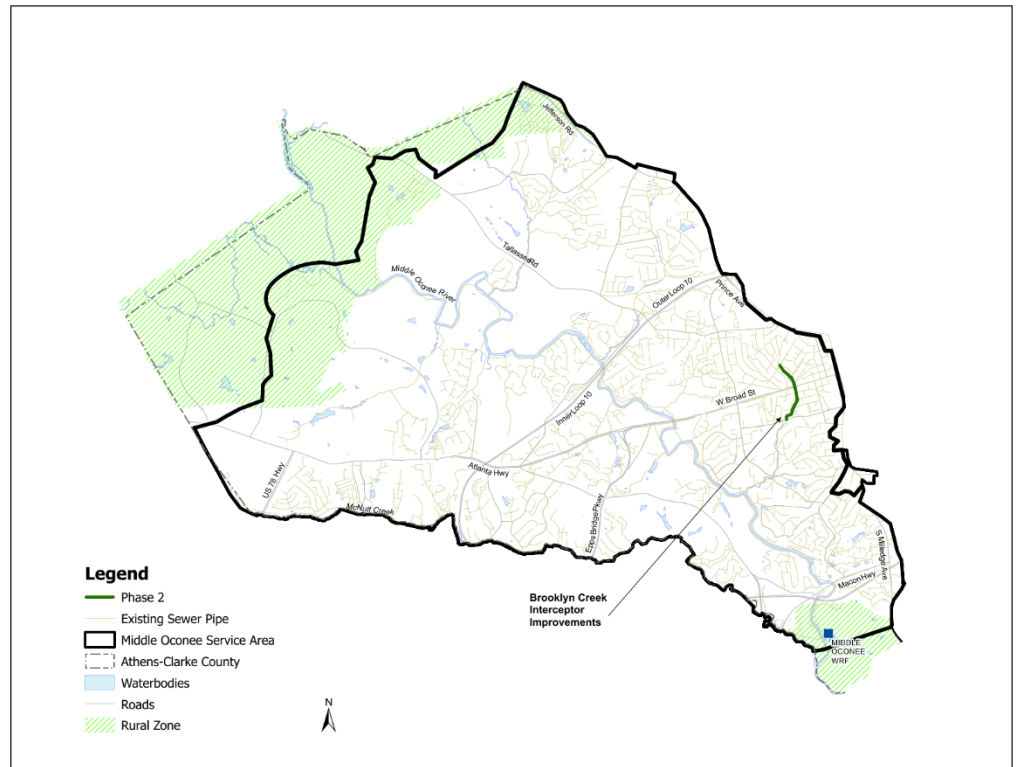

Replacement

### Project Cost

\$15,200,000

### Key Elements

1. Replace more than 4,000 LF of existing sanitary sewer (SS) pipe.
2. Replaces, and in most cases expands, sewer pipes to improve service and reduce inflow and infiltration.

### Project Description

This project will upgrade the Brooklyn Creek Interceptor Sewer by upsizing the pipe and adjusting the grade to eliminate as many aerial crossing as possible. More than 4,000 LF of interceptor sewer will undergo replacement and upsizing. Breakdown of pipe upgrade includes:

Phase 2:

- Replace 2,900 LF of existing SS pipe with 18" diameter SS pipe
- Replace 1,200 LF of existing SS Pipe with 24" diameter SS pipe
