

# APPROVED BICYCLE RACKS

Bicycle racks that are approved by the Athens-Clarke County Transportation and Public Works Director are those listed as “Racks for All Applications” or “High-Density Racks” (p.6-7) in the latest version of the [APBP Essentials of Bike Parking](#) guide.

Bicycle rack placement must follow the guidelines on page 10 of the same document, including the minimum spacing requirements for common racks that provide two bicycle parking spaces per rack.

Bicycle parking provision calculations, rack details, and rack placement must be shown on the project plan set and will be inspected prior to issuance of Certificate of Occupancy or Certificate of Completion to ensure compliance.
