## How to make Drip, Drip, Drip Game Card Sets

The following will result in two complete card sets with extra cards.

- 1) Print two copies of the Drinking, Bathing, and Cleaning sheets onto cardstock.
- 2) On one set of Drinking, Bathing, and Cleaning cards, print the "Water Card" sheet onto the flipside.
- 3) On the other set of Drinking, Bathing, and Cleaning cards, print the "Community Card" sheet onto the flipside.
- 4) Print one sheet of "Drought" and "Conservation" cards onto cardstock.
- 5) Print the "Water Card" sheet onto the flipside of the "Drought" and "Conservation" cards.
- 6) Print out three sheets of water drops. (One water drop sheet contains lined water drops. Print three of these if you prefer to have the lines for guides in cutting.)
- 7) Laminate the completed sheets and cut.
- 8) A completed set of game cards will have the following:
  - a. 12 "Water Cards": 3 Cleaning, 3 Drinking, 3 Bathing, 1 Drought, 2 Conservation
  - b. 3 "Community Cards" per player (4 players in a completed set): 4 Cleaning, 4 Drinking, 4 Bathing
  - c. 60 Water Chips

There will be extra cards left over following the printing instructions. Save for if a card is damaged. Game directions suggest inserting 2 Conservation Water Cards into the Water Card pile. If desired, 2 Drought cards could also be used instead of the suggested one.
