- Surface Water
- Wetland
- Tributaries
- Parks
- Government Parcels
- UGA Property
- K-12 Schools

North

0 0.5 1 miles

The Greenway Network Plan includes designated areas involving University of Georgia, state and federal properties. These areas highlight opportunities for comprehensive community planning and general planning discussion leading to joint project development. Such designations are not intended to restrict the development of University of Georgia, state or federal properties, but rather encourage joint planning and cooperation leading to an integrated community-wide "green infrastructure."
