

## Help Us Make a Difference

Athens-Clarke County Stormwater has hired Stantec Consulting to conduct a comprehensive review of its' Stormwater Utility Fee. Services such as street sweeping, stormwater pipe cleaning, and pollution control will be discussed in the first phase of the review to help set the budget.

The second phase of the review will include discussions about how the utility fee is charged and what types of credits can be used to reduce fees.

There will be opportunities for customers to provide input to help us move forward. Stantec will host several public meetings to share general program information and get feedback on services. Questions and comments from the public will be welcomed. If you cannot make it to a meeting, an online survey will provide another opportunity for us to hear from you.

Please visit our website at [accgov.com/stormwater](http://accgov.com/stormwater) for updates on the meetings and survey. We look forward to hearing from as many customers as we can!
