|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Develop a Shared-Use Path along the southern side of Timothy road between Skyline Parkway and Timothy Road/Loop 10 intersection with street crossings where appropriate. (As Defined by Alternative A from Station 100+00 to Station 185+97 on Sheets 13-020A to 13-037A in the Plan Sheets.) | Develop bicycle/pedestrian inter-neighborhood connectivity between Berkley Hills subdivision and Glenview subdivision (Old Macon Highway) with supporting wayfinding. (To Be Developed in Future Phases.) | Replace sidewalk from Atlanta Highway to Skyline Parkway with shared use path, or redesign the segment of Timothy Road north of Epps Bridge Parkway to include bike lanes connecting to shared-use path. (As Defined by Station 0+10 to Station 92+36 on Sheets 13-001 to 13-019 in the Plan Sheets.) |
| Develop a Shared-Use Path along the northern side of Timothy road between Timothy Road/Loop 10 intersection and Rhodes Drive (Berkley Hills Subdivision). (As Defined by Station 1000+00 to Station 1019+17 on Sheets 13-038 to 13-041 in the Plan Sheets.)                                   |                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                       |
